

ST. LOUIS COUNTY PRESCRIPTION DRUG MONITORING PROGRAM

PDMP Healthcare Professional Delegate Users

Physicians and pharmacists may supervise and delegate access to the PDMP but maintain all liability. Delegate users will be able to make patient requests on behalf of their supervisory physician or pharmacist who authorizes them to request reports on their behalf. Delegate users have an additional registration section where the supervisory provider's email must be provided.

To delegate access, supervisory providers must also register with the PDMP. Upon account approval, supervisory providers can approve, manage, and monitor delegate access. Delegate accounts are tied to the supervisory provider's account, and the supervisory provider maintains all liability.

All users of the PDMP must follow all applicable provisions of local, state, and federal laws, including but not limited to, the Health Insurance Portability and Accountability Act (HIPAA) and the Health Information Technology for Economic and Clinical Health Act (HITECH). It is recommended that all users review HIPAA prior to reviewing any patient information in the PDMP. The U.S. Department of Health & Human Services has a [HIPAA website](#) with resources and trainings for providers.

See table below for the authorized delegate roles and examples. Please contact the St. Louis County PDMP Coordinator at PDMP.DPH@stlouisco.com or 314-615-0522 with any questions.
