Would you or a loved one need additional assistance during a disaster?

If you are a St. Louis County resident and have a functional or mobility need due to physical, cognitive, or age-related conditions, registering yourself or others on the Functional Needs Registry is an excellent emergency preparedness tool.

Enrolling in the registry lets emergency responders know you may need additional assistance if a community disaster strikes, and allows them to plan and respond accordingly.

Participation in the registry is FREE and VOLUNTARY and requires completing an enrollment application. Your information is CONFIDENTIAL.
